Sandusky County Children's Mapping Study 2011© **Cost $10.00**

The *Sandusky County Children's Mapping Study* is a product associated with the *Sandusky County Children's Health Assessment*. This will be the first in a series of maps that will use the most recent available data to track changes in the health of Ohioans and present them in a format that is easy to understand.

Sandusky County has long understood the need to investigate the health status of our most vulnerable population—our children. The first local health needs assessment of children ages 0-11 in the nation was performed in Sandusky County, and the partners remain dedicated to increasing public awareness of important health status and health system issues for children and the entire population.

Ohio statewide maps included in this study:

- Perinatal Health
  - Fertility Rates
  - First Trimester of Entry into Prenatal Care
  - Births to Adolescents
  - Births to Mothers Who Smoke
  - Low Birth Weight
